

# Paste 2026

14-16 April 2026 | Lisbon, Portugal

Abstracts  
due  
18 August  
2025

EVENT BROCHURE

We are excited to announce that the 28th International Conference on Paste, Thickened and Filtered Tailings, Paste 2026, will be held 14-16 April 2026 in Lisbon, Portugal, in collaboration with Paterson & Cooke.

This conference is the twenty-eighth in the series of International Conferences on Paste, Thickened and Filtered Tailings (P&TT) initiated by the ACG in 1999, and reflects the developing maturity of P&TT management.

Paste 2026 seeks to explore the considerations needed to raise the mining industry leaders' awareness of how important environmental stewardship is to long-term industry sustainability, with regard to their tailings facilities.

We look forward to welcoming experts and practitioners from around the world to Lisbon for Paste 2026!

## Conference Themes

- Thickening and filtration
- Rheology
- Emerging issues and technology
- Surface disposal
- Backfill
- Transportation
- Case studies
- Underground and backfill

## ACG Online Repository of Conference Proceedings

Many papers from previous Paste Conferences are freely available on the Online Repository. Download papers from previous events at [papers.acg.uwa.edu.au/paste](https://papers.acg.uwa.edu.au/paste)

Accessing geomechanical excellence

## Conference Chair

### Stephen Wilson

Managing Director – Europe  
Paterson & Cooke (UK), Ltd., UK

## Calling for Workshop Hosts

The ACG is seeking expressions of interest from parties interested in hosting workshops in association with this conference, on the topic of paste, thickened and filtered tailings, and relevant areas of interest.

Proposals are due 31 July 2025 at [acgpaste.com/workshop-host](https://acgpaste.com/workshop-host)
